Training and Resources

Maria Gilbert

Staff Coordinator

LEGAL DISCLAIMER

The following presentation was accompanied by an oral presentation on **July 22-23, 2019**, and does not purport to establish legal standards that are not contained in statutes, regulations, or other competent law. Statements contained in this presentation that are not embodied in the law are not binding on DEA. Summaries of statutory and regulatory provisions that are summarized in this presentation do not purport to state the full extent of the statutory and regulatory requirements of the cited statutes and regulations. **I have no financial relationships to disclose.**

Fair Use Act Disclaimer

This presentation is for educational purposes only. This presentation may not be further copied or used, with the embedded images and videos, without an independent analysis of the application of the Fair Use doctrine.

Fair Use

Under section 107 of the Copyright Act of 1976, allowance is made for “Fair Use” for purposes such as criticism, comment, news reporting, teaching, scholarship, education and research.

Fair Use is a use permitted by the copyright statute that might otherwise be infringing. Any potentially copyrighted material used in this presentation has been reviewed and found to be used in a manner consistent with Fair Use. A completed Fair Use checklist is attached.

Course Objectives

- § **Introduce practitioners to key federal resources involving controlled substances.**
- § **Inform practitioners on key state resources involving controlled substances.**

Course Objectives

§ Provide practitioners with information on how to assist patients and their family members with overcoming controlled substance addiction.

Course Objectives

- § **Provide practitioners with information concerning resources specific to their communities.**
- § **Provide resources for practitioners related to the prescribing and dispensing of controlled substances.**

Questions to Discuss

At the completion of this block of instruction you will be able to answer the following questions:

- 1. Which website can you access in order to obtain information about DEA laws and regulations?**
- 2. Does the DEA provide a guidance manual for practitioners on the DEA website?**

Questions to Discuss

- 3. Which website provides a list of treatment centers for individuals seeking addiction treatment?**
- 4. Which websites would you go to in order to locate a controlled substance collection site?**
- 5. Who can submit a tip to the DEA online?**

The screenshot shows the DEA website interface. At the top left is the DEA logo with the text 'United States Drug Enforcement Administration'. Navigation links include 'Who We Are', 'What We Do', 'Resources', and 'Search Q'. A breadcrumb trail reads 'Home / Documents / 2017 / 11 / 28 / Fentanyl Safety Recommendations for First Responders'. The main content area features a document preview on the left and a title 'FENTANYL' in a red box. Below the title, it says 'Publication: Intelligence' and 'Fentanyl Safety Recommendations for First Responders' with the date 'November 28, 2017'. A paragraph of text reads: 'The abuse of drugs containing fentanyl is killing Americans. Misinformation and inconsistent recommendations regarding fentanyl have resulted in confusion in the first responder community. This document provides scientific, evidence-based recommendations to protect first responders from exposure.' A blue 'Download PDF' button is visible. At the bottom, there are tags for 'Narcotics (Opioids)' and 'Self Help/Personal Growth', and social media icons for Facebook, Twitter, and Email.

About the Program

The DEA and Discovery Education have joined forces to combat a growing epidemic of prescription opioid misuse and heroin use nationwide. Operation Prevention's mission is to educate students about the true impacts of opioids and kick-start lifesaving conversations in the home and classroom.

Since its launch, Operation Prevention has reached over 4M students nationwide. No local sponsorship or corporate funding is necessary for you to get started today.

DEA and Discovery Education are grateful to the National Institute on Drug Abuse (NIDA) and the Substance Abuse and Mental Health Services Administration's (SAMHSA) Center for Substance Abuse Prevention for their contributions to the development of Operation Prevention.

Summary

This guideline provides recommendations for primary care clinicians who are prescribing opioids for chronic pain outside of active cancer treatment, palliative care, and end-of-life care. The guideline addresses 1) when to initiate or continue opioids for chronic pain; 2) opioid selection, dosage, duration, follow-up, and discontinuation; and 3) assessing risk and addressing harms of opioid use. CDC developed the guideline using the Grading of Recommendations Assessment, Development, and Evaluation (GRADE) framework, and recommendations are made on the basis of a systematic review of the scientific evidence while considering benefits and harms, values and preferences, and resource allocation. CDC obtained input from experts, stakeholders, the public, peer reviewers, and a broadly chartered advisory committee. It is important that patients receive appropriate pain treatment with careful consideration of the benefits and risks of treatment options. This guideline is intended to improve communication between clinicians and patients about the risks and benefits of opioid therapy for chronic pain, improve the safety and effectiveness of pain treatment, and reduce the risks associated with long-term opioid therapy, including opioid use disorder, overdose, and death. CDC has provided a checklist for prescribing opioids for chronic pain ([http://dx.doi.org/10.1186/s12916-016-0702-2](#)) as well as a template ([http://www.cdc.gov/mmwr/preview/mmwrhtml/rr6501e1a.htm](#)) with additional tools to guide clinicians in implementing the recommendations.

Introduction

Background

Opioids are commonly prescribed for pain. An estimated 20% of patients presenting to physician offices with noncancer pain symptoms or pain-related diagnoses (including acute and chronic pain) receive an opioid prescription (1). In 2012, health care providers wrote 245 million prescriptions for opioid pain medication, enough for every adult in the United States to have a bottle of pills (2). Opioid prescriptions per capita increased 7.3% from 2007 to 2012, with opioid prescribing rates increasing more for family practice, general practice, and internal medicine compared with other specialties (3). Rates of opioid prescribing vary greatly across states in ways that cannot be explained by the underlying health status of the population, highlighting the lack of consensus among clinicians on how to use opioid pain medications (2).

Prevention, assessment, and treatment of chronic pain are challenges for health providers and systems. Pain might go unrecognized, and patients, particularly members of racial and ethnic minority groups, women, the elderly, persons with cognitive impairments, and those with cancer and at the end of life, can be at risk for inadequate pain treatment (4). Patients can experience persistent pain that is not well controlled. There are clinical, psychological, and social consequences associated with chronic pain including limitations in complex activities, lost work productivity, reduced quality of life, and stigma, emphasizing the importance of appropriate and compassionate patient care (4). Patients should receive appropriate pain treatment based on a careful consideration of the benefits and risks of treatment options.

Chronic pain has been verbally defined but is defined within this guideline as pain that typically lasts >3 months or past the time of normal tissue healing (5). Chronic pain can be the result of an underlying medical disease or condition, injury, medical treatment, inflammation, or an unknown cause (4). Estimates of the prevalence of chronic pain vary, but it is clear that the number of persons experiencing chronic pain in the United States is substantial. The 1999–2002 National Health and Nutrition Examination Survey estimated that 14.0% of adults have current

Resources For Practitioners

National Association of State Controlled Substances Authorities

www.nascsa.org

The NASCSA offers a list of all state prescription monitoring programs along with contact information.

The screenshot shows the NASCSA website homepage. At the top left is the NASCSA logo, which includes the text "NASCSA" and "National Association of State Controlled Substances Authorities". To the right of the logo is a photograph of various pills. Below the logo, the date "Monday - April 02, 2018" is displayed. A "Main Menu" is located on the left side, listing: HOME, About, Bylaws, Calendar of Events, Database NASCSA, Donate to NASCSA, Executive Committee, Links, Membership/Sponsorship, Members, and Mobile Website Info. The main content area features a "Tweets" section by @NASCSA with a tweet from @NASCSA asking "Who gets to decide whether it's medicine or drug abuse? nyp.st/2GGsSj9 via @nypost" accompanied by a photo of pills. Below the tweet are two search boxes: "Search CS Authorities by State" and "Search PMP Contacts by State", both with "Alabama" selected in the dropdown and a "Search" button. A legend explains the search results: "LEGEND for 'Contact type' displayed in above listings CS = STATE CS contact / PMP = PMP contact / CSandPMP = Both a STATE CS and PMP contact". At the bottom, there is a link to "Search the NASCSA database for current information on contacts and state profiles [Click Here]" with a magnifying glass icon.
